Dear Past and Present Owner/Operators:

Re: Scientific Chemical Processing, Carlstadt, New Jersey

I am writing to you on behalf of The Carlstadt Steering Committee. The EPA has sought your cooperation in preparing and implementing a Work Plan to address EPA's concerns at SCP Carlstadt. The Committee is of the view that primary responsibility in responding to the EPA's request for preparation of a Work Plan and implementation of that Work Plan lies with all present and past owner/operators at the Carlstadt site.

On behalf of The Steering Committee each of you (or your companies) are asked to provide to the undersigned and the EPA, in writing, an unequivocal answer to whether you (or your companies) are willing to undertake this work. The failure to respond by July 10, 1985, will be considered by The Steering Committee as a refusal to perform the work.
